Mockup Review Notes:

Director: Claire, Designer: Amanda
- When making page responsive, make sure column # shifts to accommodate width (3 →
2 → 1)
  - In 1 column, separate paragraphs with lines or symbols?
- Make background gradient a bit lighter at bottom (maybe add purple to mimic sunset?)
- Find images that are more illustrative
  - Change tide effect image
- Tide Effect section: put all text in 1 column
- When making page responsive, maybe get rid of lines connecting images to text (too
complicated, also unnecessary for eclipse section)
- Adding movement to page:
  - Moons rotating, hover effects
  - Moon's orbit section: maybe change colors when hovering?
  - But don't make images look like buttons (without link, misleading)
- Titles: more consistent in alignment (center and left or just left?)
- Add title for moon section (section 2)
- Correct name to Clai_re_ warhover whoops

Director: Amanda, Designer: Eve
- Add navigation at top, mimicking timeline
- Change title typeface to match years (stylized)
- Adding more visual interest to boxes
  - Hover highlight?
  - Extending outside edges past image (feels like stark cutoff right now)
- Line length too long, decrease column width
- Font size feels good as it is, but scaled up to full screen may be a bit big (tiny bit
smaller?)
- Change images all to duotone, get rid of halftones
- Really like pull quotes → more pullquotes earlier so that white space next to images
don't feel so empty
- Responsive: stack elements
- Add something at bottom to feel more like ending (image, color, etc)
- Add footnote with sources + credits
